MUHAMMAD ANSHAR AL FARUQ

+6281318487978 | 14.alfaruq@gmail.com | linkedin.com/in/edfaruq | https://github.com/edfaruq

Computer Science fresh graduate from Diponegoro University with hands-on experience in web application development, monitoring dashboards, and data processing and reporting. Proficient in Laravel, Next.js, React, MySQL, and Python, with experience designing responsive, user-friendly interfaces for both web and mobile. Able to leverage AI tools to improve work efficiency. Detail-oriented and analytical, with strong problem-solving skills and a fast learning curve. A collaborative team player who works effectively across cross-functional teams, focused on delivering reliable, well-documented technical solutions.

Pendidikan

Universitas Diponegoro - **Semarang** Aug 2022 - Sep 2026

Bachelor of Computer Science, 3.13/4.00

- Thesis : Design and Development of a Web-Based B2B Exporter E-Commerce Application Using the ICONIX Process Study Case at PT Telaga Cipta.
- KKN-T 35 (KATANA) : Best Program Award, Gelar Karya KKN Universitas Diponegoro: Built an interactive WebGIS (React/Next.js, Leaflet) mapping flood, landslide, and critical-land hazards across 16 districts in West Semarang through direct fieldwork with local communities, covering 30 flood zones, 35 critical-land areas, 17 evacuation routes, and 127 shelters to support local disaster management.

Pengalaman Kerja

PT Cidata Mining Servis - Mining - **Jakarta** Aug 2025 - Dec 2025

Full-Stack Web Developer

- Delivered a production-ready full-stack web platform using Laravel, Inertia.js, React, and TypeScript, covering 15+ public pages for products, portfolio, services, and company profile.
- Scaled content reach with a 3-language i18n system (ID/EN/ZH), maintaining 1,700+ translation keys per locale for consistent multilingual UX.
- Launched a searchable product catalog of 7 heavy-equipment models, each with localized specs, features, and dedicated detail pages.
- Improved content discoverability by building a site-wide search engine with 70+ keyword mappings and autocomplete suggestions.

PT Kristalin Ekalestari - Mining - **Jakarta** Jul 2025 - Dec 2025

Full-Stack Web Developer

- Developed a corporate profile website in 3 languages (Indonesian, English, and Mandarin) using Laravel and Inertia.js, covering 18 public pages for internal employees and external clients.
- Implemented structured content across 16 modules, including a news section of 38 articles in 10 categories.
- Developed a site-wide search engine that scans page content in all 3 languages and returns relevant snippets, with 10 results per page.

PT Pertamina Gas (Pertagas) - Energy - **Jakarta** Jan 2025 - Feb 2025

General Support Internship

- Built a Laravel security monitoring dashboard integrated with the Sophos Central API, pulling data from 4 sources (alerts, SIEM, endpoint, and XDR).
- Developed 5 admin modules for analytics, endpoint monitoring, alert tracking, reporting, and user access, with alerts grouped into 3 severity levels.
- Delivered near real-time metrics (5-minute cache, up to 3 API retries) plus PDF/CSV exports, with access split across 2 roles.
- Gained exposure to enterprise IT support operations, including user access workflows, endpoint monitoring practices, and incident escalation processes within a corporate cybersecurity environment.

Organizational Experience

Himpunan Mahasiswa Informatika UNDIP (HMIF) - **Semarang** Feb 2023 - Feb 2025

Staff of Art and Sport Division (Seniora)

- Facilitating programs and events for students with interests and talents in the arts.
- Providing platforms for creative expression, such as performances, or workshops.
- Encouraging collaboration and innovation among students with artistic skills.
- Leading and mentoring junior members in the Art and Sport Division while organizing creative programs and events to foster collaboration and artistic innovation among students.

Certifications

- **Cloud Computing Course by Alibaba Cloud** (2024): Completion of Alibaba Cloud Certificate Associate Cloud Computing.
- **Database Programming with SQL by Oracle Academy** (2024): Completed of implementing database designs by creating physical databases using SQL, including SQL syntax and the rules for constructing valid SQL statements.
- **Database Design Course by Oracle Academy** (2023): Completion of analyze complex business scenarios and create a data model, culminating with a project that challenges students to design a database solution for a business or organization.
